

FunTrain

Side-by-side tandem trailer

Cycling together becomes even more wonderful with the FunTrain. This side-by-side trailer is connected to the back of the Fun2Go using a towbar. This way the driver of the Fun2Go can now bring along three passengers.

The driver sits on the front side-by-side tandem and has full control over the whole train, as they are the only one that can steer and brake. On the FunTrain you are seated next to each other, so you can easily communicate with each other and enjoy the surroundings.

The FunTrain is equipped with an overrun brake. With the retractable nosewheel, a disconnected FunTrain is easy to move around.
