

Twinny and Twinny Plus

Tandems for adults

The Twinny is a two-wheel tandem for adults. On this bike, you are seated right behind each other. The space between both seats is greater than on the average tandem. While cycling, one person steers and brakes, both can pedal. The driver can optionally control the way the passenger pedals along. A big advantage of this tandem is the low step-through. On the Twinny you have a high seating position, which gives both cyclists a good overview.

The Twinny Plus is a tandem with three wheels. This tandem is based on the Twinny but has two rear wheels. The advantage of this is that you have more stability, and you can more easily get on and off the bike while it is standing still.

The tandems have a solid and stable frame that gives the bike its unique riding characteristics.

Twinny

Twinny Plus

Benefits

- ✓ Extra space between both persons
- ✓ Low step-through
- ✓ Easy to get on and off due to the solid bike stand
- ✓ On the Twinny Plus you can easily get on and off due to the three wheels
- ✓ A good overview due to the high seating position

Popular options/accessories

- Pedal assist (Smart E-Bike)
- Choice of front, or rear steering
- Different frame heights possible
- Backrest (with belt) or foot fixation for extra safety
- The driver can choose if the passenger is forced to pedal along

"Paul is not able to cycle independently but has a good physical health. He enjoys cycling a lot." - Laura
